A:About ETA

ETA is a leading provider of factory planning solution. we have 3 wholly-owned factories, providing professional consultation and services for global customers. We have more than 22 years of electronic industry experience, through our superior resources in China to provide global customers with systematic overall solutions. We not only provide a complete set of equipment, but also provide full range of technical support and services, and give customers more reasonable professional advice. We help many customers to set up factories in led, tv, mobile phone, dvb, ems and other industries all over the world. We are trustworthy.

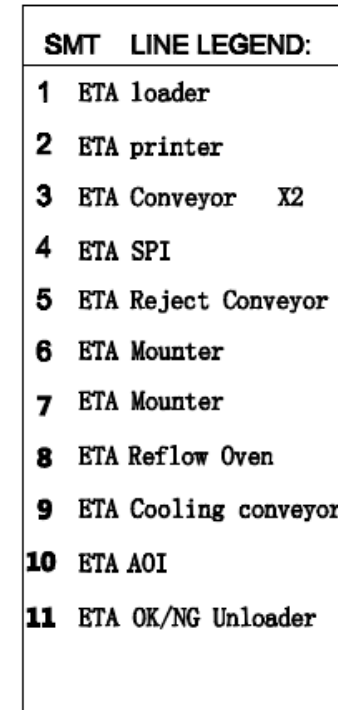

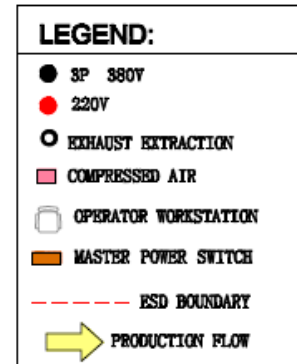

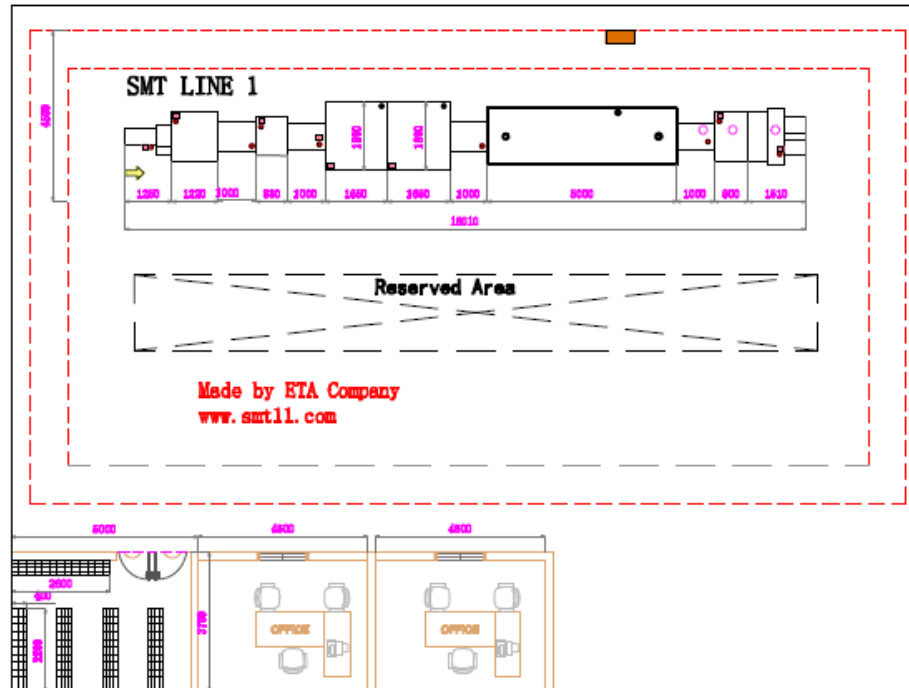

ETA core technology team has more than 22 years of experience in SMT/DIP technology, providing customers with more SMT/DIP solutions.

ETA's after-sales service team has more than 15 years of SMT service experience and more than 10 years of overseas after-sales service experience, and its service scope is all over the world.

---	---	--	---	---	--

Professional skills and abundant experience are not the whole of ETA.

Transaction is just the beginning.

We will consider every segment for our partners.

More old customer becomes our friend.

What's more, we with our partners realize value.

F: Successful Case
